ZHOUYINGCHENG LIAO

CONTACT INFORMATION

Address	800 Dongchuan Rd, Shanghai, 200240, China	**E-mail**	patrickliao2007@gmail.com
Mobile Phone	(+86) 15821183231	**Homepage**	patrickliao2007.github.io

RESEARCH INTERESTS

My research interests are in the area of computer vision, deep learning. I did research on face recognization, object detection and metric learning before. Currently, I am also interested in various topics in computer vision (e.g., self-supervised learning, person re-identification and 3D vision), intending to do research in a specific topic in the future.

EDUCATION

Shanghai Jiao Tong University Sep, 2015 - Present
Bachelor

- School of Cyber Security
- School of Eletronic Information and Electrical Engineering
- Overall GPA: 87.5/100

RESEARCH EXPERIENCE

Shanghai Jiao Tong University Apr, 2017 - Present
Undergrad Researcher

- Advisor: Prof. Bingbing Ni
- Face detection, face recognization
- Metric learning
- Self-supervised learning

UNDER-REVIEW PAPERS

Uniface: A Unified Network for Face Detection and Recognition [slide]
ICPR 2018 submission

- **Zhouyingcheng Liao**, Peng Zhou, Bingbing Ni
- A bottom-up/top-down structure is adopted to combine face detection and recognization
- An attention mechanism is adopted to replace face alignment
- A single-network model, i.e. Uniface network is proposed which achieves the accuracy of 99.0% on LFW

Live Face Verification with Multiple Instantialized Local Homographic Parameterization
IJCAI 2018 submission

- Chen Lin, **Zhouyingcheng Liao**, Peng Zhou, Jianguo Hu and Bingbing Ni
- A model which could classify live facial sequence and recorded facial sequence is proposed
- Due to local homography property of recorded facial sequence, a transformation network is embedded in the model
- Each image is divided into several patches and multiple instance learning is applied

PROJECTS

A simple Windows ftp client/server based on Qt [link]

- Course project of *Computer Network*
- Most common commands including USER, PASS, SYST, FEAT, PWD, TYPE, PASV, LIST, NLST, CWD, CDUP, MDTM, SITE, QUIT, STOR, DELE, RMD, RNFO, RNTO, MKD are implemented

SCM line-tracking car based on computer vision [link]

- I served as group leader and wrote all codes
- The computer constantly captures the line and the car by a camera
- The frames are processed by OpenCV to calculate relative position of the car to the line
- The computer controls the SCM car through bluetooth

AWARDS

MCM/ICM 2017 Problem E Meritorious Winner Feb, 2017

- Zhouyingcheng Liao, Ziping Liu and Qiucheng Wu, Advisor: Fan Wu

31^{st} Chinese Physics Olympiad (Jiangxi Province) First Prize Sep, 2014

- Rank: 21^{st}

SKILLS

Programming Language	Python 2/3 C/C++ Verilog Tex
Deep Learning Library	MXNet Pytorch Tensorflow
